OUR OFFERING

We take full responsibility for the project from concept to completion. Our client's operational and financial teams are fully involved with all aspects of the project's development. Through their involvement and the collective expertise and wisdom of our partners we are able to value engineer best-for-project outcomes.

Our design and construct service includes design co-ordination, planning, plan approval, budgeting and construction management. Our holistic approach to integrating the various facets of the project enable us to fast-track delivery from the enquiry stage benefiting clients with quicker return on investment. The benefits we bring to the table are simple: Reduced project cost and less wastage and a faster overall building delivery process and an enjoyable construction experience.

ABOUT US

SQT Civils is a civil engineering and construction company which undertakes all facets of civil engineering and construction including; bulk earthworks, service installation, road construction, pipelines, retaining structures, concrete works, project management, building works and all types of surfacing including asphalt, brick paving and concrete.

Our head office is based in the Eastern Cape and we have a satellite office based in Johannesburg. Despite being based in the Eastern Cape, we have worked for clients all over South Africa and are very proud that we cater to and specialize in all facets of civil contracting. Even though the services we offer are diverse, we always strive to deliver high quality, cost-effective projects, on time and to suit the many various needs of our clients.
